Sep 16 18:32:02 SPD-AU10 cosplay[250] <Warning>: Unable to simultaneously satisfy constraints.

Probably at least one of the constraints in the following list is one you don't want.

Try this:

- (1) look at each constraint and try to figure out which you don't expect;
- (2) find the code that added the unwanted constraint or constraints and fix it.

(Note: If you're seeing NSLayoutConstraint that you don't understand, refer to the documentation for the UIView property translatesAutoresizingMaskIntoConstraints)

```
(
    "<NSAutoresizingMaskLayoutConstraint:0x18259fa0 h=--& v=--& H:[UIView:0x18261d40(320)]>",
    "<NSLayoutConstraint:0x18264e60 UILabel:0x18264c50.width == 359*UILabel:0x18264c50.height>",
    "<NSLayoutConstraint:0x18264e90 V:[UILabel:0x18264c50(1)]>",
    "<NSLayoutConstraint:0x18266a40 UIView:0x18261d40.trailingMargin == UILabel:0x18264c50.trailing>",
    "<NSLayoutConstraint:0x18266aa0 UILabel:0x18264c50.leading == UIView:0x18261d40.leadingMargin>"
)
```

Will attempt to recover by breaking constraint

```
<NSLayoutConstraint:0x18264e60 UILabel:0x18264c50.width == 359*UILabel:0x18264c50.height>
```

Make a symbolic breakpoint at UIViewAlertForUnsatisfiableConstraints to catch this in the debugger.

The methods in the NSLayoutConstraintBasedLayoutDebugging category on UIView listed in <UIKit/UIView.h> may also be helpful.
